

## Multi-Kit/Mobility Kit

### Easily store all your content on tablets, smartphones and other digital devices.

This all-in-one media kit combines a single card with SD adapter and a USB card reader to give mobile users the versatile storage they need for all SD and USB-compatible devices, including tablets, smartphones, mobile phones, digital cameras, notebooks, e-readers, media players and more.

The kit includes one adapter with the microSDHC card as the centerpiece, and a microSDHC/USB card reader, giving users the most versatile mobile gear. The card seamlessly converts to a Secure Digital High Capacity (SDHC) card or USB format that can be used across devices to easily move photos, music, videos or data to your tablet, camera, mobile phone or computer.

#### Ultra-portable and multifunctional

- Use the microSDHC card alone for plenty of extra storage for music, games, ring tones, photos, movies and other applications on tablets and smartphones.
- Capture photos from your digital camera by making the microSDHC a full-size SDHC card with the adapter and then view images with SDHC-enabled readers, or use the microSDHC with the USB adapter with digital photo frames or on your TV's SD or USB port.
- Quickly and easily save files on a notebook computer with a full-size SD slot when the SD adapter is used with the microSDHC card.

The kits are available with a stylish USB microSDHC card reader and a 4GB, 8GB, 16GB or 32GB microSDHC card. The included keychain lets you hang the reader from your phone so you'll always have it handy when you're on the go. The kits are backed by a two-year warranty on the reader, a lifetime warranty on the microSDHC card, and legendary Kingston® reliability, service and support.

Store your entire mobile life — photos, songs, text messages, video clips and personal information on your microSDHC card, then work with it across device platforms seamlessly with the versatile Kingston Multi-Kit/Mobility Kit at your fingertips. To ensure compatibility, look for the microSDHC logo on host devices (e.g., tablets, phones and cameras).
